- Carlson, S. M., & Harrod, J. (2013, April). Validation of the Executive Function Scale for Early Childhood. In J. Griffin (Chair), *Developing the Next Generation of Preschool Outcome Measures: The Interagency School Readiness Measurement Consortium*. Poster symposium presented at the biennial meeting of the Society for Research in Child Development. Seattle, WA.
- Doebel, S., & Zelazo, P. D. (2015). A meta-analysis of the Dimensional Change Card Sort: Implications for developmental theories and the measurement of executive function in children. *Developmental Review*, 38, 241-268. <https://doi.org/10.1016/j.dr.2015.09.001>
- Carlson, S. M., Faja, S., & Beck, D. M. (2016). Incorporating early development into measurement approaches: The need for a continuum of measures across development. In J. A. Griffin, P. McCardle, & L. S. Freund (Eds.), *Executive function in preschool age children: Integrating measurement, neurodevelopment, and translational research* (pp. 45-64). Washington, DC: American Psychological Association. <https://doi.org/10.1037/14797-003>
- Meuwissen, A. S., et al. (2017). The psychometrics of the Minnesota Executive Function Scale. In P. Morris (Chair), *Strengthening the Measurement Toolbox: Development and Validation of Technology-based Executive Function and Cognitive Assessments*. Paper symposium presented at the biennial meeting of the Society for Research in Child Development. Austin, TX.
- Perone, S., Anderson, A., & Youatt, E. (2020). Don't forget your lunch: Age and individual differences in how children perform everyday tasks. *Cognitive Development*, 54, 100879. <https://doi.org/10.1016/j.cogdev.2020.100879>

MEFS is correlated with academic skills:

- Chu, F. W., vanMarle, K., & Geary, D. C. (2013). Quantitative deficits of preschool children at risk for mathematical learning disability. *Frontiers in Psychology*, 4, 1-10. [includes a prior research version of the MEFS] <https://doi.org/10.3389/fpsyg.2013.00195>
- vanMarle, K., Chu, F. W., Li, Y., & Geary, D. C. (2014). Acuity of the approximate number system and preschoolers' quantitative development. *Developmental Science*. [includes a prior research version of the MEFS] <https://doi.org/10.1111/desc.12143>

- Prager, E. O., Sera, M., & Carlson, S. M. (2016). Executive function and magnitude skills in preschool children. *Journal of Experimental Child Psychology*, 147, 126-139. <https://doi.org/10.1016/j.jecp.2016.01.002>
- Mazzocco, M. M., Chan, J. Y., & Bock, A. M. (2017). Early executive function and mathematics relations: Correlation does not ensure concordance. *Advances in Child Development and Behavior*, 53, 289-307. <https://doi.org/10.1016/bs.acdb.2017.05.001>
- Grenell, A., & Carlson, S.M. (2021). Individual differences in executive function and learning: The role of knowledge type and conflict with prior knowledge. *Journal of Experimental Child Psychology*, 206. <https://doi.org/10.1016/j.jecp.2020.105079>
- Ernst, J., Grenell, A., & Carlson, S. (2022). Associations between executive function and early math and early math and literacy skills in preschool children. *International Journal of Educational Research Open*, 3, 100201. <https://doi.org/10.1016/j.ijedro.2022.100201>
- Hwang, H., Choi, S., Guha, M., McMaster, K., Harsch, R., & Kendou, P. (2024). Indirect and direct contributions of executive function to reading comprehension. *Journal of Experimental Child Psychology*, 243. <https://pubmed.ncbi.nlm.nih.gov/38608513/>

MEFS predicts later academic achievement:

- Hassinger-Das, B., Jordan, N. C., Glutting, J., Irwin, C., & Dyson, N., (2014). Domain-general mediators of the relation between kindergarten number sense and first-grade mathematics achievement. *Journal of Experimental Child Psychology*, 118, 78-92. <https://doi.org/10.1016/j.jecp.2013.09.008>
- Reflection Sciences Technical Report (2017). Prediction of admissions measures to kindergarten reading level. *Report to Marymount School* (2014-2016).
- Reflection Sciences Blog (2020). *MEFS in Preschool Predicts Third Grade Reading and Math Achievement on the Measures of Academic Progress (MAP)*. <https://reflectionsociences.com/pre-k-executive-function-predicts-3rd-grade-academic-achievement/>
- Kalstabakken, A.W., Desjardins, C.D., Anderson, J.E., Berghuis, K.J., Hillyer, C.K., Seiwert, M.J., Carlson, S.M., Zelazo, P.D., Masten, A.S. (2021). Executive function measures in early childhood screening: concurrent and predictive validity. *Early Childhood Research Quarterly*, 57, 144-155. [includes a prior research version of the MEFS] <https://doi.org/10.1016/j.ecresq.2021.05.009>

MEFS performance is lower in at-risk populations (but not at floor):

- Hostinar, C. E., Stellern, S. S., Schaefer, C. M., Carlson, S. M., & Gunnar, M. R. (2012). The impact of early life adversity on executive function in children adopted internationally from orphanages. *Proceedings of the National Academy of Sciences*, 109, 17208-17212. [includes a prior research version of the MEFS] <https://doi.org/10.1073/pnas.1121246109>

- Doom, J., Gunnar, M. R., Georgieff, M. K., Kroupina, M. G., Frenn, K., Fuglestad, A. J., & Carlson, S. M. (2014). Beyond stimulus deprivation: Iron deficiency and cognitive deficits in post-institutionalized children. *Child Development*, 85, 1805-1812. [includes a prior research version of the MEFS] <https://doi.org/10.1111/cdev.12231>
- Fuglestad, A. J., Whitley, M. L., Carlson, S. M., Boys, C. J., Eckerle, J. K., Fink, B. A., & Wozniak, J. R. (2015). Executive functioning deficits in preschool children with Fetal Alcohol Spectrum Disorders. *Child Neuropsychology*, 21(6), 716-731. [includes a prior research version of the MEFS] <https://doi.org/10.1080/09297049.2014.933792>
- Rockhold, M., Kruger, A., de Water, E., Lindgren, C., Sandness, K., Eckerle, J., Schumacher, M., Fink, B., Boys, C., Carlson, S. M., Fuglestad, A., Mattson, S., Jones, K., Riley, E., & Wozniak, J. (2020). Social functioning across development in children and adolescents with prenatal alcohol exposure. *Alcoholism: Clinical and Experimental Research*. Online DOI: [10.1111/acer.14538](https://doi.org/10.1111/acer.14538)
- Tamm, L., Loren, R., Peugh, J., & Ciesielski, H. (2021). The association of executive functioning with academic, behavior, and social performance ratings in children with ADHD. *Journal of Learning Disabilities*, 54(2), 124-138. <https://pubmed.ncbi.nlm.nih.gov/32996376/>
- Weger, C., Boonstra, F., & Goossens, J. (2021). Differences between children with Down syndrome and typically developing children in adaptive behavior, executive functions, and visual acuity. *Scientific Reports*, 11(1), 7602. <https://doi.org/10.1038/s41598-021-85037-4>
- Cuartas, J., Hanno, E., Lesaux, N. K., & Jones, S. M. (2022). Executive function, self-regulation skills, behaviors, and socioeconomic status in early childhood. *PLoS One*, 17. <https://doi.org/10.1371/journal.pone.0277013>
- Derbie, A. Y., Altaye, M., Wang, J., Allahverdy, A., He, L., Tamm, L., & Parikh, N. A. (2025). Early life brain network connectivity antecedents of executive function in children born preterm. *Commun Biol* 8, 345. <https://doi.org/10.1038/s42003-025-07745-1>

MEFS is sensitive to EF interventions and SEL curricula:

- White, R. E., & Carlson, S. M. (2016). What would Batman do? Social psychological distance improves executive function performance in young children. *Developmental Science*, 19, 419-426. [includes a prior research version of the MEFS] <https://doi.org/10.1111/desc.12314>
- Schubert, E. C. (2016). *Examining moderators of response to executive function reflection training: Initial skill and socioeconomic status*. Doctoral dissertation, University of MN, Minneapolis, MN. <https://hdl.handle.net/11299/190500>
- Zelazo, P. D., Forston, J. L., Masten, A. S., & Carlson, S. M. (2018). Mindfulness plus reflection training: Effects on executive function in early childhood. *Frontiers in Psychology*, 9. <https://doi.org/10.3389/fpsyg.2018.00208>
- Grenell, A., Prager, E. O., Schaefer, C., White, R., Kross, E., Duckworth, A. L., & Carlson, S. M. (2018). Individual differences in the effectiveness of self-distancing for young children's emotion regulation. *British Journal of Developmental Psychology*, 37, 84-100. <http://dx.doi.org/10.1111/bjdp.12259>

Anderson, K. L., Weimer, M., & Fuhs, M. W. (2020). Teacher fidelity to Conscious Discipline and children's executive function skills. *Early Childhood Research Quarterly*, 51, 14-25. <https://doi.org/10.1016/j.ecresq.2019.08.003>

Oeri, N., & Roebbers, C. (2020). Regulating disappointment can impair cognitive performance in kindergarten children: Individual differences in ego depletion. *Journal of Experimental Child Psychology*, 190. <https://doi.org/10.1016/j.jecp.2019.104728>

Prager, E. O., Ernst, J., Mazzocco, M. M., & Carlson, S. M. (2023). Executive function and mathematics in preschool children: Training and transfer effects. *Journal of Experimental Child Psychology*, 232. <https://doi.org/10.1016/j.jecp.2023.105663>

MEFS performance is linked to brain function and psychophysiology:

Perone, S., Palanisamy, J., & Carlson, S. M. (2018). Age-related change in brain rhythms from early to middle childhood: Links to executive function. *Developmental Science*. <https://doi.org/10.1111/desc.12691>

Rudd, K., Roubinov, D., Jones-Mason, K., Alkon, A., & Bush, N. (2021). Developmental consequences of early life stress on risk for psychopathology: Longitudinal associations with children's multisystem physiological regulation and executive functioning. *Development and Psychopathology*, 33(5), 1759-1773. <https://doi.org/10.1017/S0954579421000730>

MEFS is related to parenting quality:

Meuwissen, A. S., & Carlson, S. M. (2015). Fathers matter: The role of father parenting in preschool children's executive function. *Journal of Experimental Child Psychology*, 140, 1-15. [includes a prior research version of the MEFS] <https://doi.org/10.1016/j.jecp.2015.06.010>

Distefano, R., Galinsky, E., McClelland, M. M., Zelazo, P. D., & Carlson, S. M. (2018). Autonomy supportive parenting and associations with child and parent executive function. *Journal of Applied Developmental Psychology*, 58, 77-85. <https://doi.org/10.1016/j.appdev.2018.04.007>

Meuwissen, A. S., & Carlson, S. M. (2018). The role of father parenting in child school readiness: A longitudinal follow-up. *Journal of Family Psychology*. <https://doi.org/10.1037/fam0000418>

Meuwissen, A. S., & Carlson, S. M. (2019). An experimental study of the effects of autonomy support on preschoolers' self-regulation. *Journal of Applied Developmental Psychology*. <https://doi.org/10.1016/j.appdev.2018.10.001>

Almutairi, S. M. (2019). The role of parenting factors in accelerating or hindering the development of EF in preschool children. Doctoral dissertation, Miami University, Oxford, OH. http://rave.ohiolink.edu/etdc/view?acc_num=miami1554984908299487

Castelo, R. J., Meuwissen, A. S., Distefano, R., McClelland, M. M., Galinsky, E., Zelazo, P. D., & Carlson, S. M. (2022). Parent provision of choice is a key component of autonomy support in predicting child executive function skills. *Frontiers in Psychology*. <https://doi.org/10.3389/fpsyg.2021.773492>

Other research using the MEFS:

- Martins, E. C., Osorio, A., Verissimo, M., & Martins, C., (2014). Emotion understanding in preschool children: The role of executive functions. *International Journal of Behavioral Development*. [includes a prior research version of the MEFS] <https://doi.org/10.1177/0165025414556096>
- Lee, W. S. C., & Carlson, S. M. (2015). Knowing when to be “rational.” Economic decision-making and executive function in preschool children. *Child Development*. [includes a prior research version of the MEFS] <https://doi.org/10.1111/cdev.12401>
- Ernst, J. & Burcak, F. (2019). Young children’s contributions to sustainability: The influence of nature play on curiosity, executive function skills, creative thinking, and resilience. *Sustainability*, 11, 4212. <https://doi.org/10.3390/su11154212>
